Composer Cheat Sheet

by hottehead via cheatography.com/40349/cs/12404/

Package Details

composer show -i	List installed packages
composer show <package>	Show details for package
composer install <package>	Install a package

Installing & Updating

composer install	Install packages according to composer[.json|.lock]
composer update <packages>	Update packages according to composer.json

Keep in mind how composer.json and composer.lock mechanism works! Check this page for a refresh https://blog.engineyard.com/2014/composer-its-all-about-the-lock-file

Package dependencies

composer depends <package>	Who requires a package?
