Personal Math 26 Unit 1 Cheat Sheet
by hotwire via cheatography.com/122871/cs/22996/

| Right Triangles |  |
| :---: | :---: |
| Properties of Triangles | (1) the sum of the angles equals $180^{\circ}$ AND (2) the combined length of any two side exceeds that of the third side AND (3) larger angles are opposite larger sides |
| Area | $(\mathrm{leg} * \operatorname{leg}) / 2$ |
| Pythagorean Theorem | $\mathrm{leg}^{2}+\mathrm{leg}^{2}=$ hypotenuse $^{2}$ |
| SOHCAHTOA | Sine Opposite Hypotenuse, Cosine Adjacent Hypotenuse, Tangent Opposite Adjecent |
| Special <br> Triangles | $\begin{aligned} & \text { angles }=45-45-90 \text { OR } 30- \\ & 60-90 \end{aligned}$ |
| 45-45-90 <br> Triangle | (1) the two legs are equal AND (2) the hypotenuse is $\sqrt{ } 2$ times the length of either leg |
| $\begin{aligned} & 30-60-90 \\ & \text { Triangle } \end{aligned}$ | (1) the longer leg is $\sqrt{ } 3$ times the length of the shorter leg AND (2) the hypotenuse is 2 times the length of the shorter leg |
| Acute <br> Triangle | contains three acute angles |
| Obtuse <br> Triangle | contains exactly one obtuse angle |
| Equilateral <br> Triangle | contains three side of equal length |

| Right Triangles (cont) |  |
| :--- | :--- |
| Isosceles | contains two sides |
| Triangle | of equal length |
| Scalene | Contains no two |
| Triangle | sides are of the <br> same length |
| Similar | when corres- <br> Triangles <br> ponding angles <br> are equal, then <br> corresponding <br> sides are propor- <br> tional |

| Circles |  |
| :--- | :--- |
| Circum <br> ference | $\pi \pi^{*}$ Diameter |
| Circum | $2 \pi$ Radius |
| ference |  |
| Area | $\pi r^{2}$ |
| Radian | the length of the arc <br> on the unit circle <br>  <br>  <br>  <br>  <br>  <br>  <br>  <br>  <br> $1^{\circ}=\pi / 180=\pi$ <br> (degrees) radians $\pi / 180=$ <br> radians <br> has a radius of 1 <br> and centered on a <br> coordinate plane |

| Square Roots $\sqrt{ }$ |  |
| :---: | :---: |
| Quotient Property <br> of Square Roots | $\begin{aligned} & \mathrm{Va} / \sqrt{\mathrm{b}}= \\ & \sqrt{\mathrm{a} / \mathrm{b}} \end{aligned}$ |
| $\sqrt{1 / 4}=1 / 2$ |  |
| $\checkmark$-x | not a <br> real <br> number |
| $-\sqrt{x}$ | real <br> number |
