Panes key bindings

v	Split the current pane into two, left and right
b	Split the current pane into two, top and bottom
q	Briefly display pane indexes
o	Select the next pane in the current window
h	Select the left pane in the current window
j	Select the bottom pane in the current window
k	Select the top pane in the current window
l	Select the right pane in the current window
;	Move to the previously active pane
!	Break the current pane out of the window
x	Kill the current pane
z	Zen mode pane

A window occupies the entire screen and may be split into rectangular panes, each of which is a separate pseudo terminal.

DESCRIPTION

Tmux — is a opensource terminal multiplexer

Home page — http://tmux.sourceforge.net/

Tmux config — https://github.com/tony/tmux-config

tmux may be controlled from an attached client by using a key combination of a prefix key, 'C-a' (Ctrl-a).

Windows key bindings

c	Create a new window
&	Kill the current window
w	Choose the current window interactively
1...9	Select windows 0 to 9
p	Change to the previous window
n	Change to the next window
f	Prompt to search for text in open windows
'	Prompt for a window index to select

Each session has one or more windows linked to it.

Session key bindings

$	Rename the current session
s	Select a new session for the attached client interactively
L	Switch the attached client back to the last session

A session is a single collection of pseudo terminals.

Start tmux

To start a session

```
tmux
```

To reattach a previous session

```
tmux attach
```
