

Getting started

```
# Clone the app
$ git clone <url of the projec -
t>
$ cd <name of the projec t>
# Initialize the Drucker Git
submodule
$ git submodule init
$ git submodule update
# Install all the depend encies
$ cd drucker
$ source load-env
$ drucker install
# Run the stack
$ drucker start
```

Drucker commands

drucker init	Fresh install of Drupal
drucker install	Install all deps
drucker start stop	Start/Stop the stack
drucker logs dblog	Show the logs
drucker sql-backup	Backup the SQL DB
drucker sql-restore	Restore a SQL backup
drush	Launch Drush
composer	Launch Composer
node, npm, yarn, gulp	Launch Node & utilities

Config workflow

For a successful config workflow, follow this:

1. drush cex: export your config
2. commit your changes
3. pull/merge from the remote
4. drush cim: import the brand new config
5. push

Commit convention

feat	A new feature
fix	A bug fix
docs	Documentation only changes
style	Changes that do not affect the meaning of the code (white-space, formatting, missing semi-colons, etc)
refactor	A code change that neither fixes a bug nor adds a feature
perf	A code change that improves performance
test	Adding missing tests or correcting existing tests
build	Changes that affect the build system or external dependencies
ci	Changes to our CI configuration files and scripts
chore	Other changes that don't modify src or test files
revert	Reverts a previous commit

```
<type>(<scope>): <subject>
<BLANK LINE>
<body>
<BLANK LINE>
<footer>
```
