:Gread

:Gread	Reads the index into the buffer

:Gwrite

:Gwrite	Writes the buffer to the index.

Miscellaneous

:Gremove	git rm and wipes the buffer
:Gmove target	git mv and renames the buffer
:Gmove /target	git mv (relative to the repo) and renames the buffer

:Gedit

:Gedit :path/to/file	Edits the indexed version of a file
:Gedit :0	Edits the indexed version of the current file

:Gstatus

<C-N> / <C-P>	next/previous file
<CR>	:Gedit
-	:Git add/reset
ca	:Gcommit --amend
cc	:Gcommit
D	:Gdiff
p	:Git add --patch
r	reload
o / S	:Gsplit / :Gvsplit

:Gdiff

:Gwrite (from index)	Resets the working copy from the index
:Gwrite (from working copy)	Adds the working copy to the index
:Gread (from working copy)	Resets the working copy from the index
:diffget do	Copies the diff from the other buffer to this
:diffput du	Copies the selected diff from this buffer to the other
:diffupdate	Updates the highlighting

Displays the difference between the index (left) and the working copy (right).
