

YAML Data

global.yaml

sudo_user_aliases.yaml

Auto-generated sudoers User_Aliases

theaters/<theater>.yaml

Theater specific configuration like DNS, NTP, etc

nodegroups/<nodegroup>.yaml

Nodegroups provide configurations to all of the roles they contain

nodegroups/<nodegroup>/<role>.yaml

Roles reside in nodegroups and contain configuration for specific type of host.

HOW TO: Update YAML Data

```
$ cvs up -dPR
```

```
$ cd juniper/admin/admin-systems/rotor
```

```
$ cd etc/local/dist-puppet/data
```

```
$ vim nodegroups/example/shell_server.yaml
```

```
$ cvs up -dPR
```

```
$ cvs commit -m "<commit_message>"
```

```
$ sudo cp nodegroups/example/shell_server.yaml /etc/local/dist-puppet/data/nodegroups/example
```

```
$ sudo /etc/local/sbin/puppet-rsync
```
