Joe C's Bootstrap 3 Cheat Sheet

by joechan3 via cheatography.com/26373/cs/7366/

Basic Bootstrap CSS Classes

Styling headings and body copy

.h1	.h2	.h3
.h4	.h5	.h6
.small	.lead (style content to stand out)	

Modifying alignment, transformation, and abbreviations

.text-left	.text-right	.text--center
.text-justify	.text--nowrap	.text-low-ercase
.text-capitalize	.text-uppercase	
.initialism		

Using blockquotes

<blockquote>	<block-quote> w/ <fo-oter> (for author)
<blockquote> w/ .blockquote-reverse	

Working with list styles

.list-unstyled	.list--inline	.dl-horiz-ontal (for dictionary lists)

Styling Code

<code>	<kbd> (Keyboard shortcut)
<var> (for indicating variables)	
<pre> (for multiple lines of code)	

Basic Bootstrap CSS Classes (cont)

<pre> w/ .pre-scrollable (for much longer code)

<samp> (sample output from a program)

Notes:

<abbr title="United States Air Force" class="initialism">USAF</abbr>

http://getbootstrap.com/css/#i-nitialism

<var>y</var> = <var>m</var>-<var>x</var> + <var>b</var>

Non-Typography Bootstrap CSS Styles

Working with Bootstrap Buttons

.btn btn-default	.btn btn-primary	.btn btn-su-ccess
.btn btn-info	.btn btn-warming	.btn btn-danger

Further Bootstrap Button Subclasses

.btn-lg	.btn-sm	.btn-xs
.btn-block	.active	disabl-ed="-disabl-ed" (attri-bute)

Table Styles

.table (use w/ <table> HTML element)

Further Bootstrap Table Subclasses

.table-striped	.table-hover	
.table-condensed	.table-bordered	
.active	.success	.info
.warning	.danger	

.table-responsive (use w/ .container surrounding table)

Image Classes

Non-Typography Bootstrap CSS Styles (cont)

.img-responsive (can use with .center-block)

.img-r-ounded	.img-c-ircle	.img-t-humbnail

Helper Classes

.text--muted	.text--primary	.text--success
.text--warning	.text--danger	.bg-pr-imary
.bg-su-ccess	.bg-wa-rning	.bg-danger
.pull-left	.pull--right	.center-block
.clearfix	.show	.hidden

.invisible (opacity becomes zero)

.text-hide

Responsive Utility Classes

VISIBILITY-SIZE(-DISPLAY)

Visibility: visible or hidden

Size: xs, sm, md, lg, print

Display: block, inline, inline-block, print (not necessary if visibilty is hidden)

Bootstrap Buttons work with <a>, <button>, <input>

<button class="btn btn-default" disabled="disabled">

.pull-left/right don't work with navigation elements. You must use .navbar-left/right

.text-hide comes in handy when, for example, you want to replace some headers with some images while retaining the text for SEO or semantic purposes
