Stripe events Cheat Sheet

by Jean Traullé (jtraulle) via cheatography.com/1468/cs/16010/

Account events	
account.updated	Occurs whenever an account status or property has changed.
account.application.authorized	Occurs whenever a user authorizes an application. Sent to the related application only.
account.application.deauthorized	Occurs whenever a user deauthorizes an application. Sent to the related application only.
account.external_account.created	Occurs whenever an external account is created.
account.external_account.deleted	Occurs whenever an external account is deleted.
account.external_account.updated	Occurs whenever an external account is updated.

describes an external account (e.g., card or bank account)

Application fee events	
application_fee.created	Occurs whenever an application fee is created on a charge.
application_fee.refunded	Occurs whenever an application fee is refunded, whether from refunding a charge or from refunding the application fee directly. This includes partial refunds.
application_fee.refund.updated	Occurs whenever an application fee refund is updated.

describes an application fee

Balance event	
balance.available	Occurs whenever your Stripe balance has been updated (e.g., when a charge is available to be paid out). By default, Stripe automatically transfers funds in your balance to your bank account on a daily basis.

describes a balance

Charge events	
charge.captured	Occurs whenever a previously uncaptured charge is captured.
charge.expired	Occurs whenever an uncaptured charge expires.
charge.failed	Occurs whenever a failed charge attempt occurs.
charge.pending	Occurs whenever a pending charge is created.
charge.refunded	Occurs whenever a charge is refunded, including partial refunds.
charge.succeeded	Occurs whenever a new charge is created and is successful.
charge.updated	Occurs whenever a charge description or metadata is updated.

describes a charge
