Keyword Tests

Create Robust UI Tests Faster	
	Map Objects and define Aliases first, then just select the object onscreen and the Alias should automatically be used
To call keyword from script	
	KeywordTests.scriptName.Run (not sure how to define param yet)

VB Scripting Tips

Name Mapping Tips

Use Wildcards in place of Window Index's
Use Wnd Caption to identify Generic Forms

Pitfalls to Avoid

Duplicate Function/-Subroutine Names (ie Main)	Causes problems when referring to units
Issues I have come across which need resolution
