Treatments, Materials and Packtypes

Treatment α	Material A	Paktype A1
		Packtype A2
	Material B	Packtype B1
		Packtype B2
		Packtype B3
Treatment β	Material C	Packtype C1

A randomization has multiple treatments (e.g. active vs placebo). Each treatment can use multiple materials (IMP) (e.g. placebo 1 and placebo 2). Each material can have multiple packtypes (e.g. placebo 1 can be packed in bottles of 10 pills or blisters of 12 pills).
