

Post and Page Functions

Posts

Gets previous or next post.

```
get_adjacent_post ( b $in_same_term, a|s
$excluded_terms, b $previous, s $taxonomy )
```

Gets first or last post.

```
get_boundary_post ( b $in_same_term, a|s
$excluded_terms, b $start, s $taxonomy )
```

Gets children of post.

```
get_children ( m $args, c $output )
```

Gets extended content from string.

```
get_extended ( s $post_content )
```

Gets next post.

```
get_next_post ( b $in_same_term, a|s $excluded_terms, s
$taxonomy )
```

Gets next post link.

```
get_next_posts_link ( s $label, i $max_page )
```

Displays next post link.

```
next_posts_link ( s $label, i $max_page )
```

Gets post permalink.

```
get_permalink ( i|WP_Post $post, b $leavename )
```

Prints post permalink.

```
the_permalink ( i|WP_Post $post )
```

Gets post excerpt.

```
get_the_excerpt ( i|WP_Post $post )
```

Displays post excerpt.

```
the_excerpt ( )
```

Gets post thumbnail.

```
get_the_post_thumbnail ( i|WP_Post $post, s|a $size, s|a
$attr )
```

Gets a post.

```
get_post ( i|WP_Post $post, c $output, s $filter )
```

Gets post field.

```
get_post_field ( s $field, i|WP_Post $post, s $context )
```

Post and Page Functions (cont)

Gets parents of post.

```
get_post_ancestors ( i|WP_Post $post )
```

Gets post mime type.

```
get_post_mime_type ( i|WP_Post $post )
```

Gets post status.

```
get_post_status ( i|WP_Post $post )
```

Gets post format.

```
get_post_format ( i|object $post )
```

Sets post format.

```
set_post_format ( i|object $post, s $format )
```

Gets post edit link.

```
get_edit_post_link ( i|WP_Post $post, s $context )
```

Gets post delete link.

```
get_delete_post_link ( i|WP_Post $post, s $deprecated, b
$force_delete )
```

Gets previous post.

```
get_previous_post ( b $in_same_term, a|s
$excluded_terms, s $taxonomy )
```

Gets previous post link.

```
get_previous_posts_link ( s $label )
```

Displays previous post link.

```
previous_posts_link ( s $label )
```

Gets posts.

```
get_posts ( a $args )
```

Does query have results remaining?

```
have_posts ( )
```

Is this a single post?

```
is_single ( i|s|a $post )
```

Is post flagged as sticky?

```
is_sticky ( i $post_id )
```

Gets ID of current loop item.

```
get_the_ID ( )
```

Post and Page Functions (cont)

Displays ID of current loop item.

```
the_ID ( )
```

Iterates the loop index.

```
the_post ( )
```

Gets recent posts.

```
wp_get_recent_posts ( a $args, c $output )
```

Does post have an image?

```
has_post_thumbnail ( i|WP_Post $post )
```

Does post have an excerpt?

```
has_excerpt ( i|WP_Post $post )
```

Does post have the specified format?

```
has_post_format ( s|a $format, i|WP_Post $post )
```

Custom Posts

Add a post status.

```
register_post_status ( s $post_status, a|s $args )
```

Add a post type.

```
register_post_type ( s $post_type, a|s $args )
```

Is this a post type archive?

```
is_post_type_archive ( s|a $post_types )
```

Gets/displays post type archive title.

```
post_type_archive_title ( s $prefix, b $display )
```

Add feature support to post type.

```
add_post_type_support ( s $post_type, s|a $feature )
```

Remove feature support from post type.

```
remove_post_type_support ( s $post_type, s|a $feature )
```

Does post type support a feature?

```
post_type_supports ( s $post_type, s|a $feature )
```

Sets post type of post.

```
set_post_type ( i $post_id, s $post_type )
```

Does post type exist?

```
post_type_exists ( s $post_type )
```

Post and Page Functions (cont)

Gets attachment image.

```
wp_get_attachment_image ( i $attach_id, s|a $size, b $icon, s|a $attr )
```

Gets attachment link.

```
wp_get_attachment_link ( i|WP_Post $post, s|a $size, b $permalink, b $icon, s $text, a|s $attr )
```

Gets attachment mime type icon.

```
wp_get_attachment_image_src ( i $attach_id, s|a $size, b $icon )
```

Gets attachment metadata.

```
wp_get_attachment_metadata ( i $attach_id, b $unfiltered )
```

Gets attachment thumbnail.

```
wp_get_attachment_thumb_file ( i $post_id )
```

Gets attachment thumbnail URL.

```
wp_get_attachment_thumb_url ( i $post_id )
```

Gets attachment URL.

```
wp_get_attachment_url ( i $attach_id )
```

Did page edit change slug?

```
wp_check_for_changed_slugs ( i $post_id, WP_Post $post, WP_Post $post_before )
```

Gets count of posts with post type.

```
wp_count_posts ( s $post_type, s $permission )
```

Gets mime types and file extensions.

```
wp_get_mime_types ( )
```

Gets mime type icon.

```
wp_mime_type_icon ( s|i $mime )
```

Gets attachment thumbnail metadata.

```
wp_generate_attachment_metadata ( i $attach_id, s $file )
```

Converts attachment to JS-ready format.

```
wp_prepare_attachment_for_js ( m $attachment )
```

Sets attachment metadata.

```
wp_update_attachment_metadata ( i $attach_id, array $data )
```

Bookmarks

Post and Page Functions (cont)

Gets a bookmark.

```
get_bookmark ( i|stdClass $bookmark, c $output, s
$filter )
```

Gets bookmarks.

```
get_bookmarks ( s|a $args )
```

Gets/displays all bookmarks.

```
wp_list_bookmarks ( s|a $args )
```

Other Post-Related Functions

Adds meta box to screen.

```
add_meta_box ( s $id, s $title, f $callback,
s|a|WP_Screen $screen, s $context, s $priority, a
$callback_args )
```

Removes meta box from screen.

```
remove_meta_box ( s $id, s|a|WP_Screen $screen, s
$context )
```

Gets loop item author.

```
get_the_author ( )
```

Displays loop item author.

```
the_author ( )
```

Gets posts by loop item author.

```
get_the_author_posts ( )
```

Gets loop item content.

```
get_the_content ( s $more_link_text, b $strip_teaser )
```

Displays loop item content.

```
the_content ( s $more_link_text, b $strip_teaser )
```

Gets post title.

```
get_the_title ( i|WP_Post $post )
```

Displays loop item title.

```
the_title ( s $before, s $after, b $echo )
```

Sanitizes loop item title.

```
the_title_attribute ( s|a $args )
```

Gets excerpt of proper length.

```
wp_trim_excerpt ( s $text )
```

Gets a post revision.

```
wp_get_post_revision ( i|WP_Post $post, c $output, s
$filter )
```

Post and Page Functions (cont)

Gets post revisions.

```
wp_get_post_revisions ( i|WP_Post $post, a $args )
```

Is post a revision?

```
wp_is_post_revision ( i|WP_Post $post )
```

Gets paginated link for archive.

```
paginate_links ( s|a $args )
```

Category, Tag and Taxonomy Functions

Posts

Gets post categories.

```
wp_get_post_categories ( i $post_id, a $args )
```

Sets post categories.

```
wp_set_post_categories ( i $post_id, a|i $post_cats, b
$append )
```
