

JSP Form

dfnfi : Form Input with label and error tooltip
dfnfta : Form Textarea with label and error tooltip
dfnfs : Form Select with label and error tooltip
dfntts : Defines tooltips script
dfncb : Form checkbox spring tag
dfncbs : Form checkboxes spring tag
dfnfr : Form radio buttons spring tag

Base Controller

dfnpde – Defines editor for **Date** type conversion
dfnpe – Defines editor for type conversion
dfnple – Defines editor for **List** type conversion
dfnpsn – Defines editor for empty string to null

File Templates

DFN Entity
 DFN Search Model
 DFN DAO
 DFN Service
 DFN Validator
 DFN Controller
 DFN Form Page
 DFN Search Page
 DFN Cron Job
 DFN Custom Tag

JSP Search

dfndc : Display Column Tag
dfnsi : Search input filter with label
dfnss : Search select menu filter with label

JavaScript

dfnjr : JQuery ready function

Validator

dfnves – Validates empty string
dfnmnn – Validates field not null

Entity

dfncu – Generates auditable fields, setter, getter
dfnmtm – Declare a many to many relation
dfnmto – Declares a many to one relation

DAO

dfnpne – Put not empty field to search criteria
dfnpnn – Put not null field to search criteria
dfnpo – Defines Property Order for sorting

Java

dfncnn – Checks if the collection is not empty
iter – iterates Iterable
inn – Inserts "if not null" statement
ifn – Inserts "if null" statement
lazy – Performs lazy initialization
fori – creates iteration loop
itar – iterates elements of array
itco – iterates elements of java.util.Collection
itit – iterates java.util.Iterator
itli – iterates elements of java.util.List
dfnld – Performs logging with debug message
dfnli – Performs logging with info message
dfnlj – Declares logger in the class

Search Model

dfnsfl – Declares search field of type long
dfnsfs – Declares search field of type string

SQL

dfnct – Create New Table with auditable fields
dfnip – Inserts permissions for security

Surround With

DFNCIF – Surround with c:if tags
DFNST – Surround with spring security tags
