

GBE NBSS Blood CNS barriers Cheat Sheet

by mallowy via cheatography.com/143608/cs/31350/

Anatomy

Vascular supply of the brain

2 carotid arteries & 2 vertebral arteries --> merge to circle of willis --> pial arteries --> penetrating arteries --> penetrating arterioles --> capillaries

Capillaries in brain

highly dense: 2500 - 3000 mm3, wall is 1 endothelial cell

Blood brain barrier

Semi permeable border of endothelial cells

The neurovascular unit

Astrocytes

Physiology

By mallowy

cheatography.com/mallowy/

Nutrient and metabolite transport

Blood-CNS barriers & diseases

Extra lecture info

Paul Ehrlick

Trypan Blue, Intravenous injection: Body stained, CNS unstained

E.Goldmann

Trypan Blue, Intravenous injection: Body stained, CNS unstained BUT intracere-broventricular: CNS stained, Body unstained

Anatomy of blood brain barrier confirmed as at level of capillaries

Electron microscopy, macromolecular tracers (e.g horseradish peroxidase)
