

Calculating Depreciation

Straight Line Method	Reducing Balance Method	Other Methods
Same depreciation throughout the years	Same percent, different amount	1. The sum-of-the-digits method. 2. Usage method

Stock Valuation

A **stock take** can be used to find out how much stock is being held.

Different ways to value stocks such as:

FIFO involves issuing stock in the order in which it is delivered, so that the remaining stock is valued closer to its replacement cost

LIFO involves issuing more recent deliveries first, so that closing stock is valued at the order and possible lower purchase price

Average cost recalculating every time new deliveries arrive
