### Apache2 (cont)

|  |             |
|--|-------------|
| ./configure --prefix=/usr/local/apache2 --enable-mime-magic --enable-expires --enable-headers --enable-ssl --enable-http --enable-info --enable-dir --enable-rewrite --enable-so | configure   |
| make   | apache      |
| make install   | compilation |
|  | compile     |
|  | apache      |
|  | install     |
|  | apache      |

### Apache2 Configuration

|  |                                   |
|--|-----------------------------------|
| old line                                 | new line                          |
| DocumentRoot "/usr/local/apache2/htdocs" | DocumentRoot "/var/www/htdocs"    |
| <Directory "/usr/local/apache2/htdocs">  | <Directory "/var/www/htdocs">     |
| AllowOverride None                       | AllowOverride All                 |
| DirectoryIndex index.html                | DirectoryIndex index.php          |
| index.html.var                           | index.html index.html.var         |
| AddHandler type-map var-addline:         | old line + AddHandler php5-script |
|  | php                               |
| AddType Section - addline :              | AddType application/x-httpd-php   |
|  | .php                              |
| /usr/local/apache2/bin/apachectl start   | start server                      |
| File: /usr/local/apache2/conf/httpd.conf |                                   |

### PHP 5

|  |  |
|--|--|
| mkdir /usr/src/php5  | create folder for source                       |
| cp php-VERSION.tar.bz2 /usr/src/php5   | move zip to new folder                         |
| tar xjf php-VERSION.tar.bz2  | unzip bz2 file                                 |
| ./configure --prefix=/usr/local/php5 --with-apxs2=/usr/local/apache2/bin/apxs --with-mysql=shared,/usr/local/mysql | configure php compilation                      |
| make   | compile  |
| make install   | install  |
| cp php.ini-development /usr/local/php5/lib   | move the php.ini (development instead of dist) |

### MySQL5

|  |                         |
|--|-------------------------|
| mkdir /usr/src/mysql                       | Folder for installation |
| cp mysql-VERSION.tar.gz /usr/src/mysql     | move zip to folder      |
| gunzip < mysql-VERSION.tar.gz   tar -xvf - | unzip .tar.gz           |
| groupadd mysql                             | create mysql group      |
| useradd -g mysql mysql                     | create mysql user       |
| ./configure --prefix=/usr/local/mysql      | configure installation  |
| make -j 4                                  | compile with 4 cores    |
| make install                               | install                 |
| cp support-files/my-medium.cnf /etc/my.cnf | configure mysql...      |
| cd /usr/local/mysql                        |                         |
| bin/mysql_install_db --user=mysql          |                         |
| chown -R root .                            |                         |
| chown -R mysql lib                         |                         |
| chown -R mysql var                         |                         |
| chgrp -R mysql .                           |                         |
| bin/mysqld_safe --user=mysql &             | start mysql             |
| bin/mysql                                  | connect to mysql        |

### Apache2

|  |                          |
|--|--------------------------|
| mkdir /usr/src/httpd                       | create folder for source |
| cp httpd-VERSION.tar.gz /usr/src/httpd     | copy zip to new location |
| gunzip < httpd-VERSION.tar.gz   tar -xvf - | unzip .tar.gz            |
