

STOP ORDERS (deferred orders)

LIMIT buy	buying order placed in the buyer's zone (<i>making a buy if the price is falling in specified level</i>)
LIMIT sell	selling order placed in the seller's zone (<i>making a sell if the price is going up in specified level</i>)
STOP-LIMIT buy	buying order placed in the seller's zone (<i>making a buy if the price is going up in specified level</i>)
STOP-LIMIT sell	selling order placed in the buyer's zone (<i>making a sell if the price is falling in specified level</i>)

Keyboard shortcut: V

In the implementation, **stop limit order will be transformed to the limit order.**

These orders are implemented by the price of the stop limit order, with the *limit and stop orders slipping*. Settings of the limit and the stop orders slipping may be adjusted in settings of the ticker.

If settings of the **stop orders slipping it set to 0**, this means stop-limit order will be transformed to the limit order and will be **implemented as the market order.**

ORDERS

LEFT click on ASK price	MARKET buy (sent to exchange as limit order)
RIGHT click on BID price	MARKET sell (sent to exchange as limit order)
LEFT click on BID price	LIMIT buy
RIGHT click on ASK price	LIMIT sell
V + left click	Place a deferred order aka stop-limit (<i>see section</i>)
C + left click	Place SL or TP
R	Reverse the position (ex. current position: 10 LONG. R places e 20 SELL order. Now you have a 10 SELL position). Useful to switch position on bounces
D	Close all open positions in current orderbook at market price
Left CTRL	Close all open positions across all orderbooks at market price
1	Set operational volume 1
2	Set operational volume 2
3	Set operational volume 3
4	Set operational volume 4
5	Set operational volume 5
Left ALT + click	Temporarily set current volume to actual open position (overrides operational volumes 1..5)
Z (toggle), click	Temporarily set current volume to actual open position (overrides operational volumes 1..5)

CANCEL ORDERS

SPACE	Cancel all limit orders across all orderbooks
Right ALT	Cancel all stop orders across all orderbooks
