## Cheatography

### tshark - Wireshark Command Line Cheat Sheet by mbwalker via cheatography.com/26872/cs/7667/

#### Capture interface options

| -i <interface></interface>             | name or index of interface (defaults to 1st non-lo-<br>opback) |
|--|--|
| -f <capture<br>filter&gt;</capture<br> | packet filter in libpcap filter syntax                         |
| -р                                     | disable capturing in promiscuous mode                          |
| -B <buffer<br>size&gt;</buffer<br>     | size of kernel buffer (def. 2MB)                               |
| -y <link type=""/>                     | link layer type (def. first appropriate)                       |
| -D                                     | print list of interfaces and exit                              |
| -L                                     | print list of link layer types and exit                        |

| Capture stop conditions                       |   |
|---|---|
| -c <packet count=""></packet>                 | stop after n packets (def. infinite)  |
| -a <autostop condit-<br="">ion&gt;</autostop> | duration: <num> - stop after <num> seconds</num></num>  |
|   | filesize: <num> - stop file after <num> KB<br/>files:<num> - stop after <num> files</num></num></num></num> |

| Capture output  |  |
|---|--|
| -b <ringbuffer< th=""><th>duration:<num> - switch to next file after <num></num></num></th></ringbuffer<> | duration: <num> - switch to next file after <num></num></num>    |
| opt>  | seconds  |
|   | filesize: <num> - switch to next file after <num></num></num>    |
|   | КВ   |
|   | files: <num> - ringbuffer: replace after <num> files</num></num> |

## Processing options

| -2   | perform a two-pass analysis  |
|--|--|
| -R <read filter=""></read>   | packet read filter in Wireshark display filter<br>syntax   |
| -Y <display filter=""></display>   | packet display filter in Wireshark display<br>filter syntax  |
| -n   | disable all name resolutions   |
| -N <name resolve<br="">flags&gt;</name>  | enable specific name resolutions: "mnN-<br>tCd"  |
| -d <layer type="">==<s-<br>elector&gt;,<decode_a-<br>s_protocol&gt;</decode_a-<br></s-<br></layer> | decode as, see the tshark man page for details   |
| -H <hosts file=""></hosts>   | read a list of entries from a hosts file which<br>will then be written to a capture file (implies<br>-W n) |
| disable-protocol <pr-<br>oto_name&gt;</pr-<br>   | disable dissection of <proto_name></proto_name>  |

| Processing options (cont)   |   |                                 |  |
|---|---|---------------------------------|--|
| enable-heuristic <short_na-< td=""><td colspan="2">enable dissection of heuristic</td></short_na-<> |   | enable dissection of heuristic  |  |
| me>   |   | protocol                        |  |
| disable-heuristic <s< td=""><td>hort_na-</td><td>disable dissection of heuristic</td></s<>          | hort_na-  | disable dissection of heuristic |  |
| me>   |   | protocol                        |  |
| Micellaneous options  |   |                                 |  |
| -h  | display help and exit   |                                 |  |
| -V  | dispaly version info and exit   |                                 |  |
| -o <name>:<value></value></name>  | override preference setting   |                                 |  |
| -K <keytab></keytab>  | keytab file to use for Kerberos decryption  |                                 |  |
| -G <report></report>  | dump one of several available reports and exit<br>default report="fields"<br>use -G ? for more help |                                 |  |

#### **RPCAP** options

-A <user>:<password>

#### Input file options

-r <infile> set the filename to read from (- to read from stdin)

use RPCAP password authentication

| Output file options  |   |  |
|--|---|--|
| -w <outfile -< td=""><td>write packets to a pcap-format file named "outfile" (or</td></outfile -<> | write packets to a pcap-format file named "outfile" (or |  |
| >  | to stadard output file for -)                           |  |
| -C <config<br>profile&gt;</config<br>  | start with specified configuration profile              |  |
| -F <output< td=""><td>set the output file type (def. is pcapng)</td></output<>                     | set the output file type (def. is pcapng)               |  |
| file type>   | an empty -F option will list the file types             |  |
| -V   | add output of packet tree (Packet Details)              |  |
| -O <proto-< td=""><td>only show packet details of these protocols (comma</td></proto-<>            | only show packet details of these protocols (comma      |  |
| cols>  | separated)  |  |
| -P   | print packet summary even while writing to file         |  |

# Cheatography

## tshark - Wireshark Command Line Cheat Sheet by mbwalker via cheatography.com/26872/cs/7667/

| Output file option  | is (cont)  |  |
|---|--|--|
| -S <separator></separator>                                  | the line separator to print between packets  |  |
| -X  | add output of hex and ASCII dump (Packet Bytes)  |  |
| -T pdml ps p-<br>sml text fields                            | format of text output (def: text   |  |
| -e <field></field>  | field to print if -Tfields selected (tcp.port,<br>ws.col.info)<br>this option can be repeated to print multiple fields   |  |
| -E <fieldsoptio-<br>n&gt;=<value></value></fieldsoptio-<br> | set options for output when -Tfields selected:<br>header=y n - switch headers on and off<br>separator=/t /s  <char> - select tab, space,<br/>printable character as separator<br/>occurence=f L a - print first, last or all occurences<br/>of each field<br/>aggregator=, /s /<char> - select comma, space,<br/>printable character as aggregator<br/>quote=d s n - select double, single or no quotes<br/>for values</char></char> |  |
| -t a ad d dd e -<br>r u ud                                  | output format of timestamps (def: r rel. to first)   |  |
| -u s hms  | output format of seconds (def: s - seconds)  |  |
| -1  | flush standard output after each packet  |  |
| -q  | be more quiet on stdout (when using statistics)  |  |
| -Q  | only log true errors to stderr (quieter that -q)   |  |

| Output file options (cont)                         |   |  |
|--|---|--|
| -g   | enable group read access on the output file(s)  |  |
| -W n   | save extra info in the file, if supported<br>n= write network address resolution info |  |
| -X <key>:<value></value></key>                     | eXtension options, see tshark man page for details                                    |  |
| -z <statistics></statistics>                       | various statistics, see tshark man page for details                                   |  |
| capture-co-<br>mment <comme-<br>nt&gt;</comme-<br> | add a capture comment to the newly created output file (only for pcapng format)       |  |

| Ł | 1 | 1 |   |
|---|---|---|---|
|   | - |   |   |
|   | 8 | 3 | - |
|   |   | 2 | A |
