```
<pre>
    <?php print_ r(g et_ fie ld( 'fi eld _na me'));
?>
</p re>
```

If Statement

```
<?php if(get_field('field_name')) { ?>
     If this is true, display this text.
<?php } ?>
```

Loop Through Array

```
<?php
    $items = get_fi eld ('f iel d_n ame');
    if( $items) { ?>
          <ul>
                  <?php foreac h($ items as $item)
{ ?>
                          <li> <pr e><?php print_ -
r($ item); ?>< /pr e>< /li>
                  <?php } ?>
          </u l>
<?php } ?>
```

Retrieve Value from Taxonomy Term

```
<?php the_field('field_name',
'{term_name}_{term_id}'); ?>
Ex: <?php the_fi eld ('f iel d_n ame ',' pos t_t -
ag_4'); ?>
```

```
<?php the_field('field_name','option'); ?>
```

ACF Pro Add Options Page Function

```
if( function_exists('acf_add_options_page') ) {
acf_ad d_o pti ons _pa ge();
}
```

Repeater Field

```
<?php if( have_rows('repeater_field_name') ): ?>

        <ul>

        <?php while( have_r ows ('r epe ate r_f -
iel d_n ame') ): the_row(); ?>

                <li >su b_f ield_1 = <?php
the_su b_f iel d(' sub _fi eld _1'); ?>, sub_fi -
eld_2 = <?php the_su b_f iel d(' sub _fi eld _2');
?>, etc</l i>

                <?php

                $su b_f ield_3 = get_su b_f iel -
d(' sub _fi eld _3');

               // do something with $sub_f ield_3

                ?>

        <?php endwhile; ?>

        </u l>

<?php endif; ?>
```

Hide Custom Fields Panel Function in Admin Menu

```
add_filter('acf/settings/show_admin',
'__return_false');
```

Working with Images (Returning an ID)

```
<?php $image =
wp_get_attachment_image_src(get_field('image_test'),
'full'); ?>
<img src="<?php echo $image[0]; ?>" alt="<?php echo
get_th e_t itl e(g et_ fie ld( 'im age _te st')) ?>"
/>
```

"Full" can be any size associated with Wordpress Theme
