| Ratings |
| :--- |
| Perfect |
| Approximate |
| Next Door |
| Wrong |
| Can't Verify |

| General considerations |  |
| :--- | :--- |
| Pin | Reliable online map resources, including vector and |
| resources | hybrid views <br>  <br>  <br>  <br>  <br>  <br>  <br>  Offreet imagery |

Government property registries

| Satellite vs <br> Vector | Always use the more generous layer toward the pin |
| :--- | :--- |
| Boundaries | Real or imaginary line that separates (fences, walls, <br> of the |
| gearden plants, bodies of water, other dividers etc) |  |
| Half n Half | If no clear divider, draw an imaginary line on the road | | Tennis rule | If tip of pin touches the line, it's considered inside the <br> boundary, outside otherwise |
| :--- | :--- |
| Shared | If campus, public roads crossing it are part of the <br> boundary, if particular BU or POI in a campus, the |
| spaces | boundary stops when the road is reached |

Next door $\quad$| If it drops on the immediate property next to the |
| :--- |
| intended one |

Must be on the same street (share same street name)
Same side
First property to any side
On the same block

Can't Verify When pin is within the smallest area that can be identified as a potentially correct location (clouds covering in sat image), outside it will be Wrong

| Single Rooftop |  |
| :--- | :--- |
| Rating | Explanation |
| Perfect | Falls in the rooftop of the intended property |
| Approx- | Within the boundaries (including on any rooftop that's not |
| imate | the intended one) |
| Next <br> door | On the next door property |
| Wrong | Outside the property boundaries or next door |
|  | Any pin falling outside an Approximate area in a shared <br> space will be rated Wrong |

## Can't Verify

| Rooftops |  |
| :---: | :---: |
| With evidence or not | With evidence, only the rooftop is considered Perfect, the rest will be its boundaries |
|  | Shop in a shopping mall with evidence of the location, if no evidence, the entirety of the mall will be a Perfect |
| Parcel of land | Without a rooftop, all the parcel will be Perfect there will be no Approximate |
| Leaning Building | Some imagery can show a leaning building, use consensus of vector, hybrid, street imagery and reliable online map resources |
| Perfect | Pin falls in the building's actual location as confirmed by the consensus |
| Approximate | Pin falls within the boundaries of the property including on any rooftop that's not the intended one |
| Wrong | Pin falls outside the property or next door property |
| Next door or Can't Verify | General guidelines |
| Residential <br> Property with multiple buildings | More the one building with a single address |

## Maps VI Cheat Sheet

| Rooftops (cont) |  |
| :--- | :--- |
| Perfect | Any of the rooftop of the house within the boundaries <br> of the property |
| Approximate | Within the boundaries of the property or support/auxi- <br> liary buildings |
| Next door | Next door |
| Wrong | Outside the boundaries and next door |
| Can't Verify | Guidelines |
| Multiple <br> rooftops | Single entities with multiple rooftops |
| Rules | Same rules as Residential properties with multiple <br> buildings |
| Campuses | Entire parcel is Perfect, no Approximate or Next door |

## Other Features

Without Natural features (lakes, oceans, creeks, rivers, ponds, rooftops* seas, forests etc)

Perfect If natural feature has a defining feature (water for a river, peak of a mountain), pin should fall on that feature If no natural feature (arbitrary boundary (parks, national forests), pin should fall in their polygon

Approx- Pin falls outside the defining features on still on it imate (slope of a mountain rather than the peak, shore of the lake)

## Next Door No next door

| Wrong | Pin falls in an area that does not meet the Perfect of |
| :--- | :--- |
| Approximate |  | | Can't | General rule |
| :--- | :--- |
| Verify |  |

Administr- Countries, states, provinces, cities, either Perfect or ative Wrong
divisions
