Yarn installation and upgrade

install with npm	npm install yarn -g
uninstall with npm	npm uninstall yarn -g
update with npm	*npm update yarn -g
install with choco	choco install yarn
uninstall with choco	choco uninstall yarn
upgrade with choco	choco upgrade yarn
test yarn version	yarn or yarn --version

`npm update yarn -g` does not always work. To upgrade, do `uninstall` and `install`. If your yarn is installed with one approach, it should be updated with that approach. Yarn respects npm config, eg. proxy, https-proxy.

npm

yarn commands

add	yarn global add bower

Use '--verbose' at the end to show more logs. Dependencies are cached in '%HOME%\AppData\Local\Yarn\config\global\node_modules\'. Add '%HOME%\AppData\Local\Yarn\config\global\node_modules\.bin' to your path.
