CentOS Cheat Sheet

by mrinflctor via cheatography.com/mrinflctor/

I/O Redirection

```
>      Redirect STDOUT to a file  
2>    Redirect STERR to a file  
&>   Redirect all output to a file  
2>&1  Redirect all output to a pipe  
cmd1 | cmd2 Pipe STDOUT of cmd1 to cmd2  
  
Use >> to append rather than overwrite
```

Scheduling with cron

```
#list current entries in crontab  
crontab -l  
  
#remove current entries in crontab  
crontab -r  
  
#edit existing entries in crontab  
crontab -e  
  
#format  
<minute> <hour> <day of month>  
<month> <day of week> <command>
```

File Management

```
find / - name tofind  
      Find all files named tofind  
  
find / - mmin 10  
      Find all files modified less than 10  
      minutes ago  
  
grep -i STRING  
      Search input for lines containing  
      STRING (nocase)  
  
grep -C 2 STRING  
      Search input for lines containing  
      STRING and showing 2 lines before  
      and after  
  
grep -v STRING  
      Search input for lines NOT  
      containing STRING  
  
grep -c STRING  
      Search input for number of lines  
      containing STRING
```

Bash Shortcuts

```
CTRL-c Kill current command  
CTRL-a Goto start of current line  
CTRL-e Goto end of current line  
CTRL-r Search history  
!!     Repeat last command  
^abc^def Run previous command, replacing  
          abc with def
```

Useful Snippets

```
#hostname  
      Displays FQDN of system  
  
#uname -a  
      Displays current kernel version  
  
#df -h  
      Display partitions, sizes details, and mount  
      points  
  
#chconfig --list  
      Displays all services and their status at  
      each runlevel
```

File Paths

```
/var/named  
      Bind zone files  
  
/etc/named.conf  
      Bind configuration file  
  
/etc/httpd/conf/httpd.conf  
      Main apache configuration file  
  
/var/log/httpd/  
      Default location for logs  
  
/etc/hosts  
      System hosts file  
  
/etc/resolv.conf  
      DNS lookup configuration file  
  
/etc/sysconfig/network  
      Network/hostname configuration file  
  
/etc/sysconfig/network-scripts/  
      Default location of a network setting file
```

Archiving

```
# compress (tar/gzip)  
tar cvzf <file>.tgz <directory>  
  
# extract (tar/gzip)  
tar xvzf <file>.tgz  
  
# compress (tar/bzip)  
tar cvjf <file>.tbz <directory>  
  
# extract (tar/bzip)  
tar xvjf <file>.tbz  
  
# extract (gzip)  
gunzip <file>.gzip
```

Screen shortcuts

```
CTRL-a c Create a new screen session  
CTRL-a n Goto the next screen session  
CTRL-a p Goto the previous screen session  
CTRL-a " Present a list of all sessions  
CTRL-a d Detach screen from terminal  
CTRL-a k Kill current session  
  
screen -r to reattach to a detached session
```

iptables

```
#iptables -L  
      Displays ruleset of iptables  
  
#iptables -I INPUT -p tcp -m tcp -s  
      192.168.15.254/26 --dport 22 -j ACCEPT  
      Accepts incoming SSH connections from IP  
      range 192.168.15.254/26  
  
#iptables -I INPUT -s "192.168.10.0/24" -j  
      DROP  
      Drops all traffic from IP range  
      192.168.10.0/24  
  
#iptables -A INPUT -p tcp --dport 25 -j DROP  
      Blocks all traffic to TCP port 25  
  
#/etc/init.d/iptables save  
      Saves all IPTables rules and re-applies them  
      after a reboot
```
