

### User Functions, Part 1

alt+b	Toggles "beep—after—end" on and off.
alt+c	Toggles chat mode on and off.
alt+e	Allows modification of the user's security information.
alt+f	Prints fake line noise to the user.
alt+g	Allows enabling and disabling of activity trapping and chat capturing for a user.
alt+h	Hang up on a user and return to the WFC menu.
alt+i	Toggles the User's input On and Off.
alt+k	Allows you to select a Hangup message to display (HANGUPnn.*) before hanging up on the user and returning to the WFC menu.
alt+l	Toggles the local screen on and off.
alt+m	Toggles temporary SysOp access for a user.
alt+n	Switches you to the next SysOp window in order.
alt+o	Conference System toggle.
alt+p	Displays a file from the local harddisk to the remote user.
alt+q	Turns off the "user attempted to chat" alarm.
alt+r	Displays the chat reason in the SysOp window.
alt+s	Toggles the SysOp window on and off.
alt+t	Toggles the SysOp window display between the top and bottom of the local screen.
alt+u	Toggles the user's input and output on and off.

### User Functions, Part 2

alt+v	Prompts the sysop for a validation level and then validates the online user at the chosen level.
alt+w	Same as Alt-E except that the "SysOp working" string is not displayed.
alt+z	Sends a continuous stream of beeps until the user presses a key or hangs up.
alt++	Adds five minutes to a user's total time left.
alt+-	Subtracts five minutes from a user's total time left.
alt+(F1-F5)	Changes to SysOp Window 1—5 depending.
F1-F10	Hitting one of these keys will activate the SysOp Defined Macro that was defined in System Variables.
ctrl+home	Shows a help screen with all of the SysOp function keys and a brief description.

### Other Functions

alt+n	Executes a batch file called "GLOBATn.BAT", where "n" is a number from 1 to 9.
alt+d	Prompts for a filename and then captures the contents of the screen to that filename.
alt+j	Performs a local shell to DOS.
scroll lock	Toggles Sysop Availability for chat. If On, Sysop is <i>not</i> available for chat at all. If Off, then the regularly defined chat hours are used.
ctrl+sysreq	Allows the SysOp to choose to generate a run time error.
