

### Traditional Predictive SDLC

### Newer Overlapping Phases Predictive SDLC

### Iterative Model

### Support Activities

**Maintaining the system:** Fix problems/error, Make minor adjustments, Update for changes in operating systems or environments

**Enhancing the system:** Add desired functionality, Add or change functionality to comply with regulations or legislation

**Supporting the users:** Ongoing user training, Help desk

### Methodology

### Two Approaches

To Software Construction and Modeling:

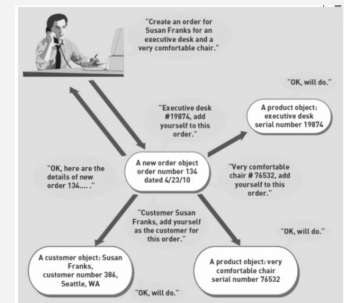

1. The Structured Approach

Earlier approach. Assumes a system is a collection of processes that interact with data. Structured analysis, design, and programming

2. The Object-Oriented Approach

More recent approach. Assumes a system is a collection of objects that interact to complete tasks. OO analysis, design, and programming

### The Object-Oriented Approach
