Uses

Some evidence suggests that cannabis can be used as
a anti seizure drug
anti emetic
and a drug used to assist in glaucoma treatment

there are many claims for cannabis, however most of these claims have little to no evidence

Non-medical uses for cannabis

Fibre

horsetails

ropes

cloths

wagon coverings

bhang thandy (south east asian drink)

Strains of Cannabis

Cannabis Indica	short and dense. dark green, wide leaves
Cannabis Sativa	tall. long light green leaves.

there is ongoing debate over the taxonomy

History of cannabis use

Originated in central china around lake qinghai 19.6 million years ago.
this is where the Eurasian steppe people came and took it the caspian and black seas.
the first human use of cannabis was on a jar in japan.
it was used as fibre by neolithic people
in 900 years bc there is some evidence of charred cannabis seeds in a ritual brazier in romania.
it was used recreationaly by the Scythians.

Classification in Australia

in 2016 medical cannabis was legalised

CBD oil went from a class 10 to a class 8
