

Tuned Profiles

Tuned	A service used for performance optimisation in an easy way
tuned-adm list	List current tuned profiles for use
tuned-adm profile desktop	Use Tuned profile Desktop
tuned-adm active	

Setting up repository access

Create a local repository to install packages from RHEL 8 ISO disk

- Create an ISO image: **dd if=/dev/sr0 of=/rhel8.iso bs=1M**

- Create a directory /repo: **mkdir /repo**

- Edit /etc/fstab and add the following line:

/rhel8.iso /repo /iso 9660. defaults 0. 0

- Use **Mount -a** to mount the ISO

- Run **Systemctl daemon-reload**

Accessing the local Repo

- Create the file **/etc/yum.repos.d/appstream.repo** with following contents

```
[appstream]
```

```
name=appstream
```

```
baseurl=file:///repo/AppStream
```

```
gpgcheck=0
```

Run **yum repolist** to verify

Using yum modules

yum module list	Show all available modules
yum module provides httpd	Search the module providing specific package
yum module info httpd	More info on specific module
yum module info --profile php	Show profiles
yum module list php	Show which stream are available
