Shortcuts to Learn Cheat Sheet by Nilesh (niparkhe) via cheatography.com/129317/cs/25633/

Vim		
Create abbrev- iations	:ab cra create react app	
Toggle Relative Line Numbers	Cmd r	
Lowercase between current position and movement m	gum	
Add a "." at the end of every line in file	:%s/.*/&.	
Change until fred	c/fred/e	
Conditional Substi- tution	:g/^\s <i>>http/s/</i> -/ - <wbr/> /g Adds a wbr after each hypen when line starts with ls>http	
Carriage Return in Macro	\r	
Paste a macro into register m from yanked text	:let @m=" <ctrl +="" r=""> <">"</ctrl>	
:g does not work in VSCode. Hence, use it		

:g does not work in VSCode. Hence, use it in SpaceVim

Cntl R pastes register contents at the end of the line of the Ex command. Hence, do not use it to paste a string in the middle of a line.
