

### Vim

Create abbreviations      :ab cra create react app

Toggle Relative Line Numbers      Cmd r

Lowercase between current position and movement m      gum

Add a "." at the end of every line in file      :%s/./&.

Change until fred      c/fred/e

Conditional Substitution      :g/\s>http/s/1-/1-<br>/g  
*Adds a wbr after each hyphen when line starts with ls>http*

Carriage Return in Macro      \r

Paste a macro into register m from yanked text      :let @m="<ctrl + r><br><">"

:g does not work in VSCode. Hence, use it in SpaceVim

Cntl R pastes register contents at the end of the line of the Ex command. Hence, do not use it to paste a string in the middle of a line.

### Git

Git's three state mgmt mechanisms  
Commit Tree, Staging Index, Working Directory

### Bash / Zsh

Check file no matter how deep it is.      cat \*\*/file\_name

List (human readable, File/directory type, Permissions)      ll
