PDF Line Break

Simple justfile

```
default: lint build test
# default recipe to display help inform  ation
default:
      @just --list
# if no default recipe, first recipe will be
default
```

Variable and Substitution

```
export RUST_B ACK TRACE := " 1"
test:
         # will print a stack trace if it crashes
          cargo test
```

Recipe with parameters

```
# recipe param as env variable with $ sign
hello $name:
       echo $name
```

backtick - capture output from evaluation

```
JAVA_HOME := jbang jdk home 11
# backtick code block
stuff := `
      foo ="he llo "
     echo $foo " wor ld"
 `
done BRANCH=git rev-parse --abbr ev-ref HEAD:
   git checkout master
sloc:
        @echwc "-l *.c lines of code"
# backtick works anywhere: string /va ria -
ble /params
```
