

PDF Line Break

Simple justfile

```
default: lint build test
# default recipe to display help information
default:
  @just --list
# if no default recipe, first recipe will be
default
```

Variable and Substitution

```
export RUST_BACKTRACE := " 1"
test:
  # will print a stack trace if it crashes
  cargo test
```

Recipe with parameters

```
# recipe param as env variable with $ sign
hello $name:
  echo $name
```

backtick - capture output from evaluation

```
JAVA_HOME := jbang jdk home 11
# backtick code block
stuff := `
  foo="hello "
  echo $foo " world"
`
done BRANCH=git rev-parse --abbrev-ref HEAD:
  git checkout master
sloc:
  @echo "$(cat *.c | wc -l) lines of code"
# backtick works anywhere: string /variable /params
```
