

What is Software Testing?

Software Testing is a method to check whether the actual software product matches expected requirements and to ensure that software product is Defect free

7 Testing Principles

1. Testing shows the presence of defects, not their absence
2. Exhaustive testing is impossible
3. Early testing saves time and money
4. Defects cluster together
5. Beware the Pesticide Paradox
6. Testing is context-dependent
7. Absence of errors is a fallacy
