requirePragma	Prretier the specified files (type: boolean)
endOfLine	Determine EOF Special character (type: string, values: lf, crlf, cr, auto)

Defenition

What is it?	Prettier is an opinionated code formatter. It enforces a consistent style by parsing your code and re-printing it with its own rules that take the maximum line length into account, wrapping code when necessary.

How to use?

Step one	npm i -g prettier
step two	`ctrl + p`, then `ext install esbenp.prettier -vscode`
Step three	create `.prettierrc` file and write your configs
Step four	`Ctrl + p`, then type **Format Document**
Final step	Enable `format OnSave`
