# Test Cheat Sheet

by offon2 via cheatography.com/145384/cs/31308/

## Find missing card

Search Card number in the **ANV** text File which is in `D:\Anv _Db di \295 847 N\D ata \LOG*.*`

2022-03-23 07:56:50.970 **1:1:0364** >c22082... >O20810....:>C000....**4635880008592040**:

Mailer **0364** associated with this Card number **4635880008592040** got read at **Com port 1**(Location of the com ports below)

2022-03-23 07:56:53.342 **3:152C** >c**4635880008592040**152

Card number **4635880008592040** read at **Com port 3** and it generates a counter **152C**

*Did the card got attached?*

Search mailer **0364** in the ANV file

2022-03-23 07:56:57.226 **4:0364 152C** >cT220823080004000000364K152P4S0

Mailer **0364** got attached at **com port 4** with the card with the counter **152C** which is card number **4635880008592040**

## Find missing mailer

`Every Job creates a BICANV file which will tell you the status of the card or mailer.`

Search Mailer number in the corresponding BICANV file, which is in `D:\Anv _Db di \295 847 N\D ata*.*`

>c22082308000403641119,_____,_____,100_,07:57:11,0-3/23/2022,000730,**0364**,,0000010011

_____,>c4635880008592040152,>D208100080032003200016301006601008000214400220823080004000000364-00,23**0***,07:57:11,03/23/2022,000740,**0364**,,0000010011

Last bit of the number(**230**) after the D-String is the status of the package. Here it is **0**. That means the mailer has processed without any error.(List of Status below). )

*Where did the mailer go?*

Search the D string (**D208100080032003200016301006601008000214400220823080004000000036400**) in the ANV

2022-03-23 07:57:11.874 **7:0364 >D208100080032003200016301006601008000214400220823080004000000036400**

Mailer **0364** went to **com port 7**

| Com ports | |
|---|---|
| 1 | 380-1 |
| 2 | 380-2 |
| 3 | 7712-Card channel |
| 4 | 7701- Attaching station |
| 5 | Sheet feeder-1 |
| 6 | Sheet feeder-2 |
| 7 | Conveyer belt(Check the status of the package to determine which conveyer belt(Bypass 1B/Bypass 2 Foreign/M-ain)). |
| 8 | 4711- Divert |
| 9 | Inserting station divert 1-A |

| Status | |
|---|---|
| 0 | Processed Good- **Main conveyer belt.** |
| 2 | Read no output[Most likely removed manually] |
| 3 | DIverted with error[search D string in the ANV. If it is showing com 7, then it went to **Bypass 1B(first)**] |
| 4 | Processed with error but OK.-**Main conveyer belt** |
| 5 | Diverted(Foreign or Quality)-**Bypass 2 Foreign** |
| 10 | Card diverted at 7701 bypass |

*Check the error stops from the report using the time from the ANV for more information
