

Overview

Super Key

Super is the OS key on your keyboard; if you're using a System76 computer, it's the Ubuntu key. On a computer that came with Windows, it's the Windows key. On a Mac, it's the Command key.

In Pop!_OS, Super handles the majority of OS and window actions.

Primary Actions

Tapping Super on its own brings up the **Activities overview**, which

is the core way of launching apps and managing your workflow.

Super + ↑ / ↓ switch workspaces up and down.

Ctrl + Super + → / ← tile

windows to the left and right of your display.

Super + Tab quickly switches between your open windows.

Window & Workspace Management

Super + Tab	Switch windows	Switch windows backwards*
-------------	----------------	----------------------------------

Super + ` (backtick)	Switch windows of current app	Switch windows of current app backwards*
----------------------	-------------------------------	---

Operating System

Super	Activities overview
-------	---------------------

Accessibility

Alt + Super + S	Toggle screen reader
-----------------	----------------------
