

### Fundamentals

Clear command window	<code>clc</code>
Clear all variables	<code>clear</code>
Clear specific variable	<code>clear &lt;variable&gt;</code>
Get standard documentation	<code>help &lt;command&gt;</code>
Get detailed documentation	<code>doc &lt;command&gt;</code>
One line comment	<code>% &lt;Text&gt;</code>
Print to command window	<code>fprintf(' &lt;Text&gt;')</code>
Continue code on next line	<code>... (Equivalent to space, don't split up 'Text')</code>

### Links for Further Information

Graphics object properties	<a href="https://www.mathworks.com/help/matlab/graphics-object-properties.html">https://www.mathworks.com/help/matlab/graphics-object-properties.html</a>

Line Properties	<a href="https://www.mathworks.com/help/matlab/ref/matlab.graphics.chart.primitive.line-properties.html">https://www.mathworks.com/help/matlab/ref/matlab.graphics.chart.primitive.line-properties.html</a>
Axes Properties	<a href="https://www.mathworks.com/help/matlab/ref/matlab.graphics.axis.axes-properties.html">https://www.mathworks.com/help/matlab/ref/matlab.graphics.axis.axes-properties.html</a>

### Mathematical Constants and Functions

$\pi$	<code>pi</code>
$e$	<code>exp(1)</code>
$\infty$	<code>inf</code>
Exponential function	<code>exp(x)</code>
Square root	<code>sqrt(x)</code>
Sine	<code>sin(x)</code>
Cosine	<code>cos(x)</code>
Tangent	<code>tan(x)</code>

### Operators

Addition	<code>+</code>
Subtraction	<code>-</code>
Multiplication	<code>*</code>
Division	<code>/</code>
Left division	<code>\ (a\b = b/a)</code>
Exponentiation	<code>^</code>

### Matrix and Vector Operations

Element-wise multiplication	<code>.*</code>
Element-wise division	<code>./</code>
Element-wise exponentiation	<code>.^</code>
Transpose	<code>.'</code>
Dot product	<code>dot(A,B, dim)</code>
Cross product	<code>cross(A, B, dim)</code>

### Format Specifiers

Single character	<code>%c</code>
Decimal notation (signed)	<code>%d</code>
Decimal notation (unsigned)	<code>%u</code>
Exponential notation	<code>%e</code>
Fixed-point notation	<code>%f</code>
String or char array	<code>%s</code>

### Creating and accessing Matrices and Vectors

Create m by n matrix filled with ones	<code>X = ones(m, n)</code>
Create m by n zero matrix	<code>X = zeros(m, n)</code>
Create m by n identity matrix	<code>X = eye(m, n)</code>
Create row vector	<code>X = [1 2 3]</code> or <code>X = [1, 2, 3]</code>
Create column vector	<code>X = [1; 2; 3]</code>
Create matrix	<code>X = [1, 2, 3; 4, 5, 6]</code>
Create a vector with consecutive numbers	<code>X = 1 : 5</code> (Start : End)
Create a vector with consecutive numbers in a specific interval	<code>X = 0 : 0.1 : 1</code> (Start : Interval : End)

### Plotting

Plot values	<code>plot(X, Y)</code>
Plot values and set formatting	<code>plot(X, Y, LineSpec)</code>
Plot new values over old plot	<code>hold on</code> followed by a new <code>plot(X, Y)</code> command
Add plot title	<code>title('&lt;Title&gt;')</code>
Add plot legend	<code>legend('&lt;Name for plotted data&gt;')</code>
For Multiple plots: Separate names with commas.	
Add x-axis label	<code>xlabel('&lt;Label&gt;')</code>
Add y-axis label	<code>ylabel('&lt;Label&gt;')</code>
Rotate y-axis label to be horizontal	<code>ylabel('&lt;Label&gt;', 'Rotation', 0)</code>
Turn on grid	<code>grid on</code>
Add text to plot	<code>text(&lt;X position&gt;, &lt;Y position&gt;, '&lt;Text&gt;')</code>
