Definitions

"study of learning in all its aspects" (Caroll, 1965) Educational psychology

"study of education" (Peel, 1956)

specializes in understanding teaching and learning in educational settings knowledge of learners, their abilities, devel stages and envi influence

Historic background		
Roots	west greek philosophers democritus - 1st to emphasize influence of home on devel personality of child	
4th century BC	plato & aristotle - system of edu to psych principles (diff types for diff ppl) aristotle - presented psych views more comprehen- sively - believed in faculty theory of mind (mind is made of diff faculties like reasoning, imagination etc) and emphasized intellectual process scholars modified from aristotle's doctrines	
Doctrine of faculties	mind is considered as 3 independent sets of power/cap- acities - 1) reasoning, understanding 2) feelings, desires, emotions, appetites 3) will	
John Locke	empirist (tabula rasa: blank slate - learning only from nurture) - learning abt external world through senses (argued that faculties are mot from soul)	
Pestalozzi	believed in and used the faculty theory 1st to psychologize edu (edu is process of drawing out	

the indiv) - evoloved learning and teaching programmes

Historic background (cont)

Herbart	german prpfessors, rejected faculty theory
and	herbert - imp of interest & assimilation of ideas
Froebel	froebel - 1st to establish kindergarten, emphasized
	imp of early experiences in learning
18th	William James - book: principles of psychology (1890)
century	J.M.Cattell - indiv differences, mental testing
	Alfred Binet - 1st inteligence scale

Scope of edu psych

Lindgren (1976) - 3 elements/focus areas in edu -		
1.	most imp bcz w/o learner, there is no learning, variables -	
learner	indiv differences, devel char, mental health, intelligence,	
	personality, psych issues	
2.	what ppl do (direct - writing, answering, computing etc,	
learning	indirect obs - perceiving, thinking, remembering) -	
process	includes psych of learning, factors affecting it, diagnosis	
	for learning difficulties	
3.	teacher, classroom setting (ventilation, light, noise, seat	
learning	arrangement), attitude of teacher, class morale, emo	
situation	climate of school	

Strategies to reduce bullying

Olweus (1993), bullying is an aggressive, intentional act carried out by an individual or a group repeatedly over time, and involves the imbalance of power, with the bully wielding the power. The behaviour could be emotional or physical.

Strategies to reduce bullying (con	Proponents of edu psych				
factors for not reporting	: teachers' lack of interest, willingness and skill in managing bullying behaviour, as well as the ethos and culture the school upholds stop talking about school,	William James	>> lab ps his recco start less expand u	children effectively: observation in classrooms sych exps. mendation: know child's level of knowledge + cons at a point just above child's knowledge to understanding ent, analysis, interpretation	
vicums	regularly arrive late, miss classes or make excuses to miss school	John Dewey		ed 1st major edu psych lab in US, Chicago,	
Conflict resolution, peer mediation strategies and group therapy focused on increasing self-esteem have proved ineffe- ctive with bullies	bullying results from a power imbalance, rather than from deficits in social skills		1) children - active, learn best by doing >> passive, sit quietly in seats 2) edu should focus on whole child + emphasize adaptation to envi (child should learn to think, reason, adapt, be reflective problem solvers)		
Strategies/interventions-			democratic edu - competent edu for all (irres of gender, SES etc)		
school level	punishment role play - to teach victims how to handle bullying situations teach victims to identify verbal attacks	E. L. Thorndike	assessm teaching, hone chil edu psyc	ent, measurement and scientific ideas of	
classroom level	school code of conduct - modelling of desirable behavior reinforce classroom rules + structure		OH Micasi	diction (tosts, exams)	
		Principles of development: It is a			
		product of interaction			
individual level	discussions with bullies, victims and parents improve teacher knowledge about classroom-based bullying prevention activities	follows and	orderly	either cephalocaudal (top to bottom) or proximal (horizontal)	
		continous process			
		goes from bilateral (learning to use parts of body) to unilateral (collective indiv)			
	playground supervision	different aspects of indiv are interrelated			
reporting bullying - to school management, parents, CRs info disseminations (abt dangers + consequences of bullying behav -		individualised process			
		cumulative			
to both bully & victim focus group discussions (B,V)		proceeds from general to specific			
keep them busy with CCA's		rate of devel differs wrt gender			
increase security & frisking (for guns, knifes)					
separate students

Effective teaching

teachers must have:

(1) professional knowledge and skills

Subject-Matter Competence - thoughtful, flexible, conceptual understanding of subject matter (knowledge about organizing ideas, connections among ideas, ways of thinking and arguing, patterns of change & beliefs about a discipline, ability to carry ideas from one discipline to another)

Instructional Strategies -

- a) constructivist approach learner-centered actively constructing their knowledge and understanding with guidance from the teacher
- b) direct instruction approach structured, teacher-centered teacher control & direction, maximise student learning time (2) commitment, motivation (help students self motivat & take
- accountability + high expectations for their achievement), and caring In commitment, skills- thinking (open-minded, curious, accurate interpretation), goal setting & instructional planning (high goals + specific criteria for success + organize lessons), classroom management (hangle misbehavior + establish rules + monitor

management (hangle misbehavior + establish rules + monitor activites + organize groups), communication skills (verbal + tuning in to students' nonverbal communication, and constructively resolving conflicts + interaction with parents), assessment knowledge (choose type) and technological skills (imrpove, support learning), developmental appropriate teaching practices

[D-TACTIC = D-developmental appropriate teaching practices, T-thinking, A-assessment development, C-comm, T-techological, I-instructional planning and goal setting, C-classroom management]

Exceptional children

exceptional child - deviates from average/normal child (physical, intellect, emotional, social) that they cannot be benefitted from regular classroom programme and needs special treatment in school - W M Cruichshank

Types:

1. intellectually	gifted, slow, educable mentally retarded,
exceptional	severelly mentally retarded
2. physical	impaired - vision, hearing, speech, brain injured, crippled
3. emotional	delinquents

Exceptional children (cont)

need for special edu	 they dont benefit from regular classes for making mental and physical handicapped properly trained - assests of society insight to problems of exceptional children + solve them
how to identify gifted child	IQ 110-140+, high social potentiality (all rounders), 2-4% of population in IQ by doctors (behav char -early lang & walking, pinching at food, peer at strangers), group IQ or achievement tests, school marks, teachers obs
physical char of gifted child	fall ill less, overall faster (proximo, cephalo) devel
mental char of gifted child	360 superiority, better reasoning, generalization, comphrension, seeing bigger pic, interest in abstract subs, more socialable, emotional, independence, maturity, well-adjusted
