

### Editor

Ctrl + Space	Save experience
Space	If a tag is selected, moves it to the pointer's location

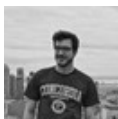

### Launch Page

<code>&amp;lang=fr</code>	Pre-select French as experience language. Replace 'fr' with any supported language
<code>&amp;disable-lang-picker</code>	Disables the language picker to prevent the learner from changing language
<code>&amp;hide-lang-picker</code>	Hides the language picker altogether
<code>&amp;playbackMode=Preload</code>	Pre-select <b>Preload</b> as launch mode. Will wait until the experience is entirely downloaded before starting
<code>&amp;playbackMode=Smartload</code>	Pre-select <b>Smartload</b> as launch mode. Will load the experience in the background in an optimized fashioned to avoid loading screens as much as possible
<code>&amp;playbackMode=Stream</code>	Pre-select <b>Stream</b> as launch mode. Will attempt to play the experience through streaming without pre-loading any content

To use these features, add the command to the launch page url of the experience that you wish to share.

For instance, to share experience with id `yNJSPLfr20WVx2h-ykDmaVQ` with English as mandatory language and with preloading enabled, use:

```
https://my.uptale.io/Experience/LaunchPage?id=yNJSPLfr20WVx2hykDmaVQ&lang=en&disable-lang-picker&playbackMode=Preload
```
