

GREP

```
grep -B n 'string' FILE.txt
```

Display n lines before matching string

```
grep -A n 'string' FILE.txt
```

Display n lines after matching string

```
grep '\.{10\}' FILE.txt
```

Select line lines equal or longer than 10 characters

```
grep -r -i --include *.vbs "PATTERN"
```

Grep for specific file types containing string:

sed

```
sed -i '/pattern/d' FILE.txt
```

Delete entire line containing a sting

```
sed -i -e 's/deletethis//g' FILE.txt
```

Delete string from file

```
sed -i 's/old-word/new-word/g' FILE.txt
```

Replace all occurrences of string with another string

```
sed 's/$/PATTERN/'
```

Append string (PATTERN) at the end of line
