Hping3 version 1.4 Cheat Sheet

by ramkumaplays via cheatography.com/60600/cs/15755/

| Base Options | | | Mode (cont) | | | ICMP | | | | |
|--------------|------------|---|--|--|--|----------------|---|----------------------------------|--|--|
| -h | --help | show this help | Example: hping --scan 1-30,70-90 -S www.target.host | | | -C | --icmptype | icmp type (default echo request) | | |
| v | --version | show version | - -- listen mode | | | -K | --icmpcode | icmp code (default 0) | | |
| c | --count | packet count | 9 listen | | | IP | | | | |
| i | --interval | wait (uX for X microseconds, for example -i u1000) | -a --spoof spoof source address | | | - --force-icmp | send all icmp types (default send only supported types) | | | |
| | --fast | alias for -i u10000 (10 packets for second) | --rand-dest random destination address mode | | | --icmp-gw | set gateway address for ICMP redirect (default 0.0.0.0) | | | |
| | --faster | alias for -i u1000 (100 packets for second) | --rand-source random source address mode | | | --icmp-ts | Alias for --icmp --icmptype 13 (ICMP timestamp) | | | |
| | --flood | sent packets as fast as possible. Don't show replies. | -t --ttl ttl (default 64) | | | --icmp-addr | Alias for --icmp --icmptype 17 (ICMP address subnet mask) | | | |
| n | -- | numeric output | - --id id (default random) | | | --icmp-help | display help for others icmp options | | | |
| q | --quiet | quiet | N | | | UDP/TCP | | | | |
| I | - - | interface name (otherwise default routing interface) | - --winid use win* id byte ordering | | | -s --baseport | base source port (default random) | | | |
| V | -- | verbose mode | W | | | | | | | |
| D | verbose | | -r --rel relativize id field (to estimate host traffic) | | | | | | | |
| Z | --debug | debugging info | -f --frag split packets in more frag | | | | | | | |
| Z | --bind | bind ctrl+z to ttl (default to dst port) | -x --morefrag set more fragments flag | | | | | | | |
| Z | --unbind | unbind ctrl+z | -y --dontfrag set don't fragment flag | | | | | | | |
| | --beep | beep for every matching packet received | -g --fragoff set the fragment offset | | | | | | | |
| Mode | | | - --mtu set virtual mtu, implies --frag if packet size > mtu | | | | | | | |
| default mode | | | -o --tos type of service (default 0x00), try --tos help | | | | | | | |
| TCP | | | - --rroute includes RECORD_ROUTE option and display the route buffer | | | | | | | |
| -0 | --rawip | RAW IP mode | - --lsrr loose source routing and record route | | | | | | | |
| -1 | --icmp | ICMP mode | - --ssrr strict source routing and record route | | | | | | | |
| -2 | --udp | UDP mode | - --ipproto set the IP protocol field, only in RAW IP mode | | | | | | | |
| -8 | --scan | SCAN mode | | | | | | | | |
