

### Workspaces

|                           |                                           |
|---------------------------|-------------------------------------------|
| <code>alt-X</code>        | Switch space to X                         |
| <code>alt-sh ift-X</code> | Move window to space X                    |
| <code>alt-tab</code>      | Switch between current and previous space |

### Changing Modes

|                                      |                                                                   |
|--------------------------------------|-------------------------------------------------------------------|
| <code>alt-slash</code>               | Enter/Toggle <b>tiling</b> layout horizontal/vertical             |
| <code>alt-comma</code>               | Enter/Toggle <b>accordion</b> layout horizontal/vertical          |
| <code>alt-sh ift -se mico lon</code> | Enter <b>service mode</b>                                         |
| <code>f</code>                       | Toggle <b>floating/tiling</b> layout <b>while in service mode</b> |

Accordion - NO window overlap  
 Tiling - See windows at the same time  
 Floating - Use mouse to move windows

### Within Space Window Management

|                                 |                                                            |
|---------------------------------|------------------------------------------------------------|
| <code>alt-sh ift -hjk l</code>  | Move window in current space based on hjkl                 |
| <code>alt-hjkl</code>           | Change focus based on hjkl                                 |
| <code>alt-comma</code>          | Toggle <b>accordion</b> layout between horizontal/vertical |
| <code>alt-slash</code>          | Toggle <b>tile</b> layout between horizontal/vertical      |
| <code>alt-sh ift -min us</code> | Decrease focused window size (in tile layout)              |
| <code>alt-sh ift -plu s</code>  | Increase focused window size (in tile layout)              |

### Resizing Windows

|                                 |                                                       |
|---------------------------------|-------------------------------------------------------|
| <code>alt-slash</code>          | Toggle <b>tile</b> layout between horizontal/vertical |
| <code>alt-sh ift -min us</code> | Decrease focused window size (in tile layout)         |
| <code>alt-sh ift -plu s</code>  | Increase focused window size (in tile layout)         |

Can only be done in **TILING** layout
