

Get Started

Install Flutter	https://flutter.dev/docs/get-started/install
Install Android Studio	https://flutter.dev/docs/get-started/editor?tab=androidstudio
Install Flutter Plugin in Android Studio	File -> Settings -> Plugins -> Flutter
Iphone as Mobile Device	Buy Developer Account or use Emulator
Other Mobile Device	Connect using by USB and enable Developer Mode
Emulator	AVD Manager -> Create Virtual Device
Hot Reload	STRG+S -> App is updated automatically

pubspec.yaml code

```
add      cupertino_icons: ^0.1.2
dependency
example

syntax  dependencies: flutter: sdk: flutter
         cupertino_icons: ^0.1.2 + english_w-
         ords: ^3.1.5
```

main.dart code

```
Importing from a package
import 'package:flutter/material.dart';

Run a class (e.g. MyApp())
void main() => runApp(MyApp());

Set title in appBar
appBar: AppBar( title: Text('Welcome to Flutter'), )

Set text in the body
body: Center( child: Text('Hello World'), )

display something in a list
return ListTile( title: Text( pair.asPascalCase, style: _biggerFont, )

random words class
class RandomWordsState extends State<RandomWords> { @override Widget build(BuildContext context) { final wordPair = WordPair.random(); return Text(wordPair.asPascalCase); } }

set AppBar
return Scaffold( appBar: AppBar( title: Text('Startup Name Generator'), ), body: _buildSuggestions(), );
```
