Hey Vector... I have a question

You **must** say "I have a question" before asking any question to Vector, then wait for Vector to say "Ready" before continuing:

User Registration

1. Say “Hey Vector”
2. Wait for the ding sound and his Back Light to turn blue
3. Say your name (“My name is Ash”)

Vector will confirm he understood by showing a yellow light and pronounce your name.

If Vector thinks he recognizes you, he will ask, “Have we met before ?”

- If you answer **no**, he continues scanning and enrolling your face
- If you answer **yes**, he says, “I already know a <name>.”

Software updates

Software updates for Vector are fully automated. When on Wi-Fi, the robot checks for updates every hour and applies updates once per day between 1am and 5am.

You can check what version of software Vector is on by opening the Vector Robot app, then tapping the Settings icon on the top right, and clicking "Updates".

Anki: A new future

Anki, the company that created Cozmo and Vector, went bankrupt in April 2019 and shut down the following month. In December 2019, Anki assets were acquired by Digital Dream Labs.

Special thanks to the Anki Robot Chat Discord server and the OFFICIAL DIGITAL DREAM LABS Vector Owners Facebook group for many of these commands.

Feature Fridays

Digital Dream Labs recently started Feature Friday! Every Friday, starting Friday 1st May and continuing for 24 straight Fridays, they are releasing a new cloud-side feature for Vector!
