Connection string

Connection string

The connection we are using in our intermediate as expressjs - nodejs.

```
mongodb+srv://kylebuilds:
<PASSWORD>@facebook-crm-dev-
bdag6.mongodb.net/test?retryWrites=true
```

Mongo DB version 4.0

we are using mongo db 4.0 in our project as provided by cloud mongo db.

Chrome Extension

Chrome Extension

Extensions are small software programs that customize the browsing experience. They enable users to tailor Chrome functionality and behavior to individual needs or preferences. They are built on web technologies such as HTML, JavaScript, and CSS.

Extract User List

User List

The content js of chrome extension file extract list of users who we are messaged. After abstraction we send list of users to background js to send a data to mongo. we are using API for this built in express js - node js.

Extension Login

We are authenticated a user in order to use a extension. There is API build in express js. User have register first on moxycrm.com
