RHEL9 Cheat Sheet

by searnes7 (searnes7) via cheatography.com/204378/cs/43563/

Minimum System Requirements

RAM	1GiB
Storage	10 GiB
Connectivity	Network Card
File System	XFS

Shell

Alias	`alias newcmd ='o ldcmd'`
Internal commands	Part of the shell itself. Not loaded from disk.
External command	Exists as executable file on disk.
Locate command	`which cmd`
Run command in current dir	`./cmd`
$PATH	Variable of list where cmds are found
show $PATH contents	`echo $PATH`

I/O Redirection

STDIN	< or 0<
STDOUT	> or 1>
STDERR	2>
Write to file (initial/overwrite)	`echo test > file.txt`
Append to file	`echo test2 >> file.txt`
Send STDERR to STDOUT	`ls badpath > file 2>&1`
STDOUT to another command	`ls list.txt | less`
Hide STDERR but show contents	`ls badpath 2> /dev/null`
Hide STDERR but redirect contents	`ls badpath 2> /dev/null > output`
