

Block 1	
Purpose	Servers
Free Tier	Yes
Note about something	

Types	
Compute	High performance workloads ¹
Memory	workloads requiring large datasets in memory ²
Storage	workloads requiring high sequential r/w access on local storage ³
General Purpose	Balance of above ⁴

¹ batch processing; media transcoding; machine learning; gaming servers; scientific modelling

² large in-memory databases and real-time big data analytics.

³ large databases, data warehousing

⁴ variety of workloads, such as web servers, development environments, and small databases

Something Else	
gp2	general purpose
iop2	io intensive stuff
another noter	

Purchasing Options	
On Demand	- Most expensive
Reserved	- 1 or 3 year options - Suitable for long workloads - Convertible reserved instances with flexible
Savings Plans	- 1 or 3 year options - Commit to an amount of usage
Spot Instances	- Short workloads - Cheap - Can lose access to instance

Third Col	
This	That

Another Block
