## Cheatography

#### SharePoint Developer Cheat Sheet Cheat Sheet by Samuel Levesque (Sharepointerie) via cheatography.com/20859/cs/3739/

General querystring tricks		
Web Part Maintenance Page	?contents=1	
Open Page Modal	?isdlg=1	
Setting Initial Ribbon	? InitialTabId=Ribbon.Lib rary	
Set page mode	?mode=edit	
Set page view	?PageView=Personal	
Set the tool pane view	?ToolPaneView=2	
Set the mobile view	?mobile=1	

Web Part Maintenance Page is usefull to remove a web part when a bad webpart causes the whole page to crash.

Open Page Modal : allow you to open in a dialog without the chrome. Setting Initial Ribbon will display the specific tab as selected when the Server ribbon is rendered.

Set the page mode will allow you to switch between the edit or the view mode.

Set the page view will allow you to switch between the Personal view or the Shared view.

URL location in SharePoint	
View content and structure	/_layouts/sitemanager.aspx
View the user information list	/_catalogs/users/simple.aspx
View the taxonomy hidden list	/Lists/TaxonomyHiddenList/AllIt ems.aspx
Log in as another user	/_layouts/15/closeConnection.as px?loginasanotheruser=true
Save a site as a template	/_layouts/savetmpl.aspx

#### Tokens at the beginning of a URL in SP2013

URL of the ControlTemplates virtual folder for the current website	~controlT emplates-
URL of the Layouts virtual folder for the current website	~layouts
URL of the current website	~site
URL of the parent site collection of the current website	~sitecolle ction

# Tokens at the beginning of a URL in SP2010 Web site (SPWeb) relative link ~site site collection (SPSite) relative ~sitecollection

link	n
Tokens at the beginning of a UI	RL in an App
URL of the parent site collection of the current website	~sitecollectio n
URL of the current website	~site
URL of the app web of an app for SharePoint	~appWebUrl
URL of the ControlTemplates virtual folder for the current website	~controlTem plates
URL of the host web	~hostUrl
URL of the logo of the host web	~hostLogoUr I
URL of the Layouts virtual folder for the current website	~layouts
URL of a remote web application in an app for SharePoint	~remoteApp Url
List querystring tricks	

List querystring tricks	
Finding the Id (Guid) of a List	? List=%7B26534EF9%2DAB3A %2D46E0%2DAE56%2DEFF16- 8BE562F%7D
Finding the internal name of a column	?Field=fieldInternalName

#### List querystring tricks (cont)

eld=fieldName&SortDir=Desc

To find the Guid of a list you must change "%7B" to "{", change all "%2D" to "-" and change "%7D" to "}"

To filter a list you must set internal field name in the the FilterField parameter (not the display name) and the value in the FilterValue parameter. You can specify multiple filter : FilterField1, FilterField2 etc...

You can use the SortField and SortDir parameters to sort on any column in the view either Desc or Asc.

# Tokens that can be used inside a URL in SP2013

URL of the ControlTemplates virtual folder for the current website	{ControlT emplates}-
ID of an item in a list or library (an integer)	{ItemId}
URL of the item being acted upon	{ItemUrl}
URL of the Layouts virtual folder for the current website	{Layouts}
ID of the current list (a GUID)	{ListId}
Recurrence index of a recurring event	{Recurren celd}
URL of the current website	{Site}
URL of the parent site of the current website	{SiteColle ction}
URL of the current website	{SiteUrl}
HTTP Request URL	{Source}
