Gold IRA

What is a Precious Metals IRA?	What Kinds of Precious Metals Can a Precious Metals IRA Hold?
A Precious Metals IRA is a Traditional, ROTH, SEP, SIMPLE, Rollover, or Inherited IRA that owns precious metals (gold, silver, platinum, or palladium). IRA holders have been allowed to use funds to purchase approved precious metals since 1998 after the Taxpayer Relief Act of 1997, expanding investment options beyond paper assets.	Includes gold, silver, platinum, and palladium. Gold: Limited to 1 ounce, ½ ounce, ¼ ounce, and 1/10 ounce Gold American Eagles (Uncirculated or Proof) or American Gold Buffalo Coins, or other gold products (coins or bars) with a minimum purity of .995%. Silver: Must be at least .999% pure. Platinum and Palladium: Must be at least .9995% pure.

Why

Why Do People Diversify Their Portfolios with Precious Metals?	Why Invest in Gold Bars?

Why (cont)

Provide diversification and liquidity with no credit risk; gold is especially attractive during periods of increased market volatility. Many investors choose to diversify retirement portfolios with alternative assets not correlated to the stock market.	Wealth Preservation: Gold has a proven track record as a hedge against inflation and economic instability, protecting wealth during uncertain times. Lower Premiums: Compared to gold coins, bars often have lower premiums over the spot price, offering cost-effective investment options. Simplicity and Efficiency: Gold bars lack the intricate details of coins, making them a straightforward investment option. Flexibility: With a variety of sizes available, investors can choose gold bars that suit their budget and goals. Global Liquidity: Universally recognized, gold bars can be easily bought or sold anywhere in the world.

Gold Bars
