

# Face + Jaw - CN V & VII Cheat Sheet by Siffi (Siffi) via cheatography.com/122609/cs/22861/

# Sensation of V

Pattern of sensory loss -

1 division = peripheral nerve lesion

>1 division = Root/BS lesion

"onion skin" = BS lesion

Type of sensory loss

Dissociated sensory loss (pain + temperature affected, touch preserved) = BS lesion

Presence of limb motor &/or sensory signs? =

Yes + with cranial nerve palsies = intrinsic BS lesion

Yes + without CN palsies = supratentorial/upper cx lesion

#### Conditions

Vascular - ischaemia (dorsal/lateral area)

Neoplastic - benign/malignant

Demyelination - MS

Syringobulbia

Acoustic Neuroma

Trigeminal neuroma

Meningitis

Petrositosis (inflammation of petrous part of temporal bone)- otitis media, osteitis/meningitis - VI affected too

Skull base Nasopharygeal cancer/Mets

Cavernous sinus Involvement of IV, VI, + V1

- Tumour, intracavernous aneurysm, cavernous sinus thrombosis (oedema + pain in the eye +ICP), Tolosa Hunt syndrome

# Face + Jaw - CN V & VII Cheat Sheet by Siffi (Siffi) via cheatography.com/122609/cs/22861/

#### Conditions affecting VII

Bells Palsy: at stylomastoid foramen Ramsay Hunt at geniculate ganglion

Hemifacial Spasm at exit from BS

#### **Localising Concepts**

Unilateral involvement of the lower face Contralateral supranuclear lesion (UMNL) - Vascular, Tumour, Demyelina-

tion, Infection

Unilateral involvement of the upper and lower face + contralateral

eye closure

Ipsilateral nuclear/infranuclear lesion

#### Peripheral Nerve Lesion

000	
S&S	Causes
Unilateral weaknesss	Parotid gland lesion
Usually localised to specific muscle group	Parotid operations
	Facial Trauma
	Haematoma

#### Facial Canal

S&S	Causes
Unilateral, complete facial weakness	F# of skull base
Loss of taste +salivation	Spread of middle ear infection
	Bell's palsy - most common
	Leukaemic deposits

### Internal Auditory Meatus

S&S Causes

Ramsey Hunt Syndrome: Herpes Zoster of CN VII + Chorda Tympani

Vesicular rash on external ear

LMNL paralysis of facial nerve

Loss of taste sensation over anterior 2/3 of tongue

#### Acoustic tumours/meningioma

S&S

V,VIII (IX, X, XI) palsy

Loss of taste, salivation & lacrimation

Hyperacusis

# Face + Jaw - CN V & VII Cheat Sheet by Siffi (Siffi) via cheatography.com/122609/cs/22861/

Wallenberg syndrome	
S&S	Causes
Long tract signs	Dorsal BS lesion @ level of pons - Vascular/ischaemic in origin (PICA)
Ipsilateral LMNL to face	Demyelination
Ipsilateral VI palsy	MND
Ipsilateral loss of pain & Temp of face	Syringobulbia
Contralateral decrease in touch, position and vibration	Tumour
Contralateral decrease in pain and temperature in limbs
