

Installation

```
brew update
```

```
brew install mysql
```

Secure after install

```
mysql _secure_install
```

MySQL comes with a script that helps you secure your installation. Run the following command and follow the on-screen prompts

This script will prompt you to set a root password, remove anonymous users, disallow root login remotely, and remove the test database.

Uninstall

```
brew uninstall mysql
```

Starting MySQL As A Service

```
Start MySQL Service brew services start mysql
```

```
Stop MySQL Service brew services stop mysql
```

Start MySQL only when you need it

```
mysqld start
```

start the daemon that way the service is not always running.

```
mysqld stop
```

Log into MySQL

```
mysql
```
