

# Angiontensin II Receptor Blockers (ARBS) Cheat Sheet by ssz44f via cheatography.com/34643/cs/10848/

Hypotension

Hyperkalemia

### ARBS end in "-sartan"

Actions are very similar to ACE inhibitors

Used for patients who are unable to tolerate the adverse effects of ACE inhibitors

# PRIMARY USE

HF

\*For those who cannot tolerate ACE inhibitors

candesartan (Atacand)

### PROTOTYPE DRUG

### NURSE'S ROLE

Monitor Impaired Hyper CBC kidney kfunction alemia

Assess for hypotension

PATIENT TEACHING

Contraception

Sodium/Potassium interaction

# autoiMECHANISM OF ACTION

disease Receptor agonist that block type 1 angiotensin II receptors on

blood vessels & the heart

Dilate arteries and veins reducing arterial pressure, thus preload and afterload improving

cardiac output
