Style Look Lab — Quick Reference

Style Look Lab is a personal style companion that pairs free self-guided quizzes with photo-based tools. Start with the colour season quiz, face shape detector, body shape and Kibbe tests, then explore skin tone, hair type and porosity checks. Photo colour analysis suggests a likely 12-season palette from one to three images, while Hairstyle AI previews cuts and colours on your own photo with credits. Results are meant as helpful references rather than verdicts, and new accounts get two free credits. Visit Style Look Lab to try the tools..

Quick reference to the free style and colour tools at Style Look Lab.

Quick start

Pick a free quiz to explore your colour season, face shape or style type, then move to the photo tools when you want a preview. Try one feature at a time and treat each result as a starting point rather than a rule.

Suggested way to explore the tools.

Colour tools

Photo colour analysis suggests a likely 12-season palette from one to three selfies before you commit to a full report.

Photo-based colour reference.
